

Transmission Services

2010 NOS Opt Out Studies

Posted: 8/16/2010

BPA is offering system impact study agreements for transmission service requests (TSRs) 74181844, 74204535, 74369302, 74382649, 74369271, 74241493, 74262611, 74172904, 74204701, 74181766, 74293098, and 74379053, which opted out of the 2010 Network Open Season (NOS). BPA intends to consolidate the system impact studies (SIS) of these TSRs into a cluster study because:

1. these TSRs were submitted by customers that opted out of the 2010 NOS,
2. these TSRs have the same source and POR, and
3. these TSRs have similar service commencement dates and the same service termination dates.

BPA estimates that the system impact studies for these TSRs will be complete in March of 2011. The customers who submitted these TSRs will be required to sign a SIS agreement and will be responsible for their respective costs of the cluster study.

BPA is offering a system impact study agreement for transmission service requests (TSRs) 73325285, 73325316, 73325336, and 73325367, which opted out of the 2010 Network Open Season (NOS). BPA intends to consolidate the system impact studies (SIS) of these TSRs into a cluster study because:

1. these TSRs were submitted by a customer that opted out of the 2010 NOS,
2. these TSRs have the same source and POR and sink and POD, and
3. these TSRs have the same service commencement and termination dates.

BPA estimates that the system impact studies for these TSRs will be completed in March of 2011. The customer who submitted these TSRs will be required to sign a SIS agreement and will be responsible for the costs of the cluster study.
